PROFESSIONAL SUMMARY

Cybersecurity-focused aspiring SOC Analyst with hands-on experience in network traffic analysis using Wireshark and practical exposure to SIEM, Windows security logs, phishing analysis, and incident response. Familiar with TCP/IP, HTTP, DNS, TLS, Linux, Windows, Splunk, and Wazuh. Currently developing blue team and security operations skills through practical labs, cybersecurity training, and security-focused projects. Seeking a SOC Analyst Intern or Cybersecurity Intern opportunity.

EXPERIENCE

Astra Quantum Tech – Peshawar, KPK

August 2026 – Present

Cybersecurity Trainee

- Participating in the Summer of Cybersecurity 2026 program through live cybersecurity sessions, practical labs, security assessments, and industry mentorship.
- Developing foundational knowledge of cybersecurity, networking, system security, threat analysis, and security best practices through hands-on training.
- Collaborating with peers in a remote learning environment while applying cybersecurity concepts to practical exercises and security scenarios.

EDUCATION

Fazaia Inter College, Shaheen Camp, Peshawar, Pakistan

June 2024 – June 2026

Intermediate in Computer Science (ICS) – Physics, Mathematics, Computer Science

Fazaia Inter College, Shaheen Camp, Peshawar, Pakistan

May 2022 – May 2024

Matriculation in Science

PROJECTS

Network Traffic Analyzer | Wireshark, TCP/IP, HTTP, DNS, TLS, Packet Analysis

GitHub

- Analyzed network traffic using Wireshark to capture and inspect packets in a controlled environment, examining communication patterns and packet-level details.
- Analyzed a simulated malware infection and identified a compromised host across NBNS, Kerberos, and SAMR protocols as part of the project investigation.
- Applied network analysis and troubleshooting concepts to strengthen practical skills relevant to SOC Analyst and Blue Team roles.

Home SIEM Lab | Splunk, Wazuh, SIEM, Windows Event Logs, VirtualBox

- Built a home SIEM lab using Splunk and Wazuh to centralize Windows event logs and monitor endpoint activity in a virtualized environment.
- Created security monitoring dashboards and investigated security alerts to develop practical experience with SIEM-based detection and analysis.

Windows Security Event Log Analysis | Windows Event Logs, Event Viewer, MITRE ATT&CK

- Simulated attacker behaviors on a Windows virtual machine and analyzed security events using Windows Event Viewer.
- Mapped observed security findings to MITRE ATT&CK techniques to identify indicators of compromise and understand attacker behavior.

Phishing Email Analyzer | Email Headers, SMTP, SPF, DKIM, DMARC

- Analyzed suspicious emails by examining email headers, sender authentication records, URLs, and attachments to identify phishing indicators.
- Applied SPF, DKIM, and DMARC concepts to evaluate email authenticity and investigate potential phishing activity.

Incident Response Case Study | NIST Incident Response, Log Analysis, IOC Analysis

- Investigated a simulated security incident using the NIST incident response framework and documented the attack timeline and indicators of compromise.
- Documented response actions across incident identification, analysis, containment, and recovery stages.

TECHNICAL SKILLS

Cybersecurity: SOC Operations, Security Monitoring, Network Security, Incident Response, Log Analysis, Threat Analysis, IOC Analysis

Networking & Protocols: TCP/IP, HTTP, DNS, TLS, SMTP

Security Tools: Wireshark, Splunk, Wazuh, Windows Event Viewer, MITRE ATT&CK

Operating Systems: Linux, Windows 10/11

Programming: Python

Tools & Platforms: Git, GitHub, Netlify, Vercel, VirtualBox

Other: Microsoft Office, Canva, Graphic Design, Technical Documentation, Troubleshooting

CERTIFICATIONS

- Google Cybersecurity Professional Certificate – Google via Coursera – In Progress
- Introduction to Cybersecurity – Cisco Networking Academy – Completed
- Certified Cybersecurity Foundations – Hackviser – Completed
