

MUHAMMAD UMAR

Aspiring SOC Analyst | Cybersecurity Enthusiast

Peshawar, KPK, Pakistan | 0334-1909305 | muhammadumar12414@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Cybersecurity-focused Computer Science student with hands-on experience in network packet analysis using Wireshark, and certifications in core cybersecurity fundamentals through Cisco Networking Academy and HackerViser. Comfortable with TCP/IP, HTTP, DNS, and TLS, and currently building SOC-focused blue team skills through hands-on labs in SIEM, log analysis, and incident response. Seeking a SOC Analyst Intern or Cybersecurity Intern role.

EDUCATION

Qurtuba University of Science and Information Technology, Peshawar, Pakistan

Aug 2026 – 2030 (Expected)

Bachelor of Science in Computer Science

Fazaia Inter College, Shaheen Camp, Peshawar, Pakistan (FBISE)

Completed 2026

Intermediate in Computer Science (ICS) – Physics, Mathematics, Computer Science

CERTIFICATIONS

- Google Cybersecurity Professional Certificate — Google (via Coursera) — In Progress
- Introduction to Cybersecurity — Cisco Networking Academy — Completed
- Core Cybersecurity Course — HackerViser — Completed

PROJECTS

Network Traffic Analyzer | Wireshark, TCP/IP, HTTP, DNS, TLS, Packet Analysis

- Analyzed live network traffic and a simulated malware infection using Wireshark; completed 2 of 5 planned modules, identifying a compromised host across 3 protocols (NBNS, Kerberos, SAMR) and publishing findings on GitHub.

Home SIEM Lab (Splunk & Wazuh) | Splunk, Wazuh, SIEM, Windows Event Logs, VirtualBox

- Built a home SIEM lab using Splunk and Wazuh to centralize Windows event logs, monitor endpoint activity, create detection dashboards, and investigate security alerts in a virtualized environment.

Windows Security Event Log Analysis | Windows Event Logs, Event Viewer, MITRE ATT&CK

- Simulated attacker behaviors on a Windows VM, analyzed security event logs in Event Viewer, and mapped findings to MITRE ATT&CK techniques to identify indicators of compromise.

Phishing Email Analyzer | Email Headers, SMTP, SPF, DKIM, DMARC

- Analyzed suspicious emails by examining headers, sender authentication records (SPF, DKIM, DMARC), URLs, and attachments to identify phishing indicators.

Incident Response Case Study | NIST Incident Response, Log Analysis, IOC Analysis

- Investigated a simulated security incident using the NIST incident response framework, documenting the attack timeline, indicators of compromise, and response actions from identification through recovery.

TECHNICAL SKILLS

Programming Languages: Python

Networking & Protocols: TCP/IP, HTTP, DNS, TLS

Security Tools: Wireshark, Packet Analysis, Splunk, Wazuh

Operating Systems: Linux, Windows 10/11

Developer Tools: Git, GitHub, Netlify

Design: Canva, Graphic Design

Soft Skills: Analytical Problem-Solving, Technical Documentation, Team Collaboration
